

Ukraine Crisis Barometer (EU5+PT)

.....
Digital Index - Week 10 (7-13 march 2022)

Methodology*

Data that
makes sense

The **Russia-Ukraine conflict**, as well as having grave humanitarian consequences, is already having a **direct impact on consumer behavior** and the communication and advertising **activity of brands**. Much like during the recent COVID-19 pandemic, **the war in Ukraine is occupying a significant portion of consumer attention**, transforming both their mood and consumption patterns.

Here at Nethology, we've launched a **weekly digital barometer** to study the evolution of both **user behaviour and media outputs related to the conflict**. The main objective is to measure the **evolution of interest** in the Ukrainian war among internet users and digital media.

In order to facilitate comparability over time and between the various markets analysed (EU5 + Portugal), **we created an index** that encompasses three metrics:

- Volume of **Google searches** related to the conflict
- Volume of **media headlines** that mention the conflict
- Volume of **Twitter posts** that mention the conflict (among users with > 5,000 followers)

This report will give you access to the **most viral conflict-related search trends, news and tweets in each market**.

It also analyses looks at which **brands have been mentioned most often in relation to the conflict**, in both the media and on social media, and gives examples of the **most virial brand-related content**.

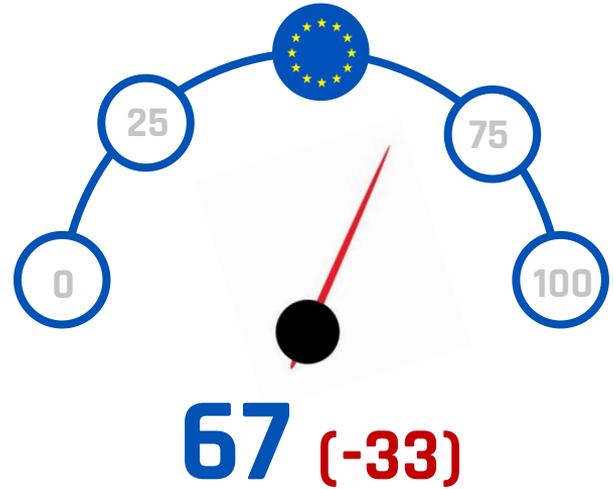

Table of contents

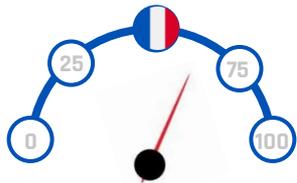

- [Resume](#)
- [Trends in searches, news and social media](#)
- [Top contents](#)
 - [France](#)
 - [Germany](#)
 - [Italy](#)
 - [Portugal](#)
 - [Spain](#)
 - [United Kingdom](#)
- [Most mentioned Brands](#)
- [Top brand-related tweets](#)

Resume Digital Index | Week 10

- Both user and media **interest** in the Ukraine conflict **declined** this week after having peaked the week prior (week 8). Interest **nonetheless remains at a medium-high level** (average index 67 out of 100) across all the countries analysed, and **is highest in Italy** (Index 73).
- Google **searches fell drastically** (-46%). Publications **in the media and social media** also fell, but at a slower rate (-25% and -28% respectively).
- In practically all countries, **searches related to the reception of refugees** in general, and **Ukrainian children** in particular, have **increased**.
- **Iconic American brands** that have decided to stop operating in Russia feature highly in the **'most frequently mentioned brands'** section this week, including **McDonald's and Coca-Cola**, as well as brands from the technology space **like Facebook and Instagram**, whose access has been restricted in the country.
